

26 November 1956

25X1A9a

Notes phoned to [REDACTED] this date for use in a Special Report being prepared for the President on Accomplishments in Calendar Year 1956, specifically restricted to three items.

1. The NIS Program has now achieved almost 90% initial coverage of the JCS high priority areas, and over 60% coverage world wide.
2. In addition to regularly scheduled production, the NIS on Antarctica was produced and published March 1956, to satisfy a priority requirement of OCB for basic intelligence to serve as a basis for policy discussions (pursuant to NSC 5424/1).
3. To meet steadily increasing Government requirements, the NIS Program has undertaken greatly expanded intelligence research and production on International Communism, including the addition of an NIS element which will treat specifically and exclusively with this subject (NIS 108 and Supplement VI ).
